

Bioenergetic Water Vitaliser

biobird biotechnology **WV**

Eko-energetische Wasserbelebung

Einsatzbereiche

- Trinkwasser und Kreislaufwasser

Technische Daten

- Wasserdruck: bis 20 bar
- Betriebstemperatur: +1°C bis +95°C
- Max. Druckverlust 0,4 bar (bei max. Durchfluss)

Typ	Durchflussleistung bei 0,4 bar	Anschluss
3/4"	2,0	16
1"	3,3	25
5/4"	5,0	32
2"	8,0	38
2,5"	9,0	51
3"	12,0	54
4"	14,0	75
	20,0	102

TYP A 3/4"

Vorteile der Energie-Wasser-Optimierung

- arbeitet mit reiner Naturenergie
- ohne Strom
- ohne Zusätze
- service- und wartungsfrei

Werkstoffe

Alle Geräte sind in V2A Edelstahl gefertigt.
Geprüfte Sicherheit
Made in Germany – ges. gesch.

Montageanleitung

Integration in die Wasserleitung vielseitig möglich
(siehe Gebrauchsanweisung). Vor Frost schützen!

WEITZ GmbH – WEITZ-WASSERWELT
An der Milltenberger Str. 2 Nr. – D-53838 Kleinwalstedt
Tel. +49 (0)6022-21210 – Fax +49 (0)6022-21980

Bioenergetic Water Vitaliser

Water is a basic requirement for the existence of every creature.

If water appears freely in nature (e.g. a spring) it contains valuable energies and information.

If, however, it is pressed at high pressure through endless pipelines, important elements are lost. Technical systems (electricity, radio, etc.) damage our water.

Nature is a role model for the **biobird®** water vitalising method.

This treatment makes it possible to give our water its original qualities back again.

This is how the **biobird®** water vitalising method works:

Swirling

The special composition of the **biobird® Water Vitalisierer** subjects the water flowing through to a high degree of swirling. This swirling is based on the natural course of a river and vitalises the water. (operational principle of the legendary austrian natural scientist Viktor Schaubberger).

Magnetisation

Homogeneous magnetisation takes place in response to the terrestrial magnetic field. The crystal structure of the lime in the water is transformed by this and the accumulation of lime and rust (e.g. in pipelines) is reduced or decomposed respectively.

Information

Due to the swirling and magnetisation the water is prepared for selective new information. Highly energised information water is found – in closed chambers - in **biobird® Waster Vitaliser**. This deenergised vibration transfer bases on the law of resonance.

The Romans and the Greeks already knew about the positive feature of water vitalising. The illustration shows an antique clay drinking water conduit pipe dating back to the 1st century AD. The spirally processed inner wall ensures permanent swirling that improved the quality of the drinking water as it passed through even in those days.

Benefits of the **biobird**[®] water vitalising method:

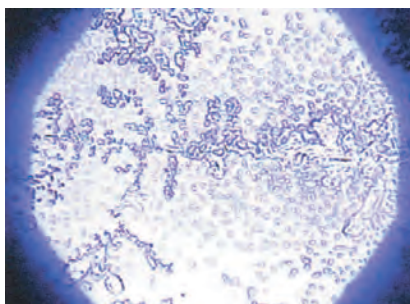

- normal tap water gets that positive quality of high-class spring water back again
- vitalised water tastes better and fresher
- it has a longer lifetime
- vitalised water feels softer when taking a bath/showering
- it is characterised by greater germ stability
- vitalised water improves plant growth due to optimum nutrient uptake
- accumulations of lime and rust are minimised, thus lowering the costs for cleaning piping and boiler systems
- lime residue can be removed easily from sensitive surfaces (fittings, tiles)

Savings due to the **biobird**[®] water vitalising method:

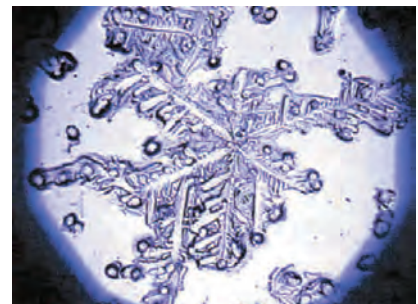

- up to 30 % less use of washing and cleaning agents due to reduced surface energy of the water
- up to 50% chlorine agent reduction possible (odour)
- savings achieved of between 3 – 6 % when using vitalised water in the heating system due to improved thermal transfer
- the **biobird**[®] **Water Vitaliser** works without electricity and without chemical agents
- thus no costs for operation, upkeep and maintenance

Crystal analysis of untreated tap water (magnified 400-fold)

The difference can clearly be recognised in the more pronounced development of the crystals.

The same water following bioenergetic vitalising (magnified 400-fold)

Type A biobird® Water Vitaliser *

Dimensions available:
3/4" to 4".

for tap water and circulation water

for use in:

- private households
- industrial plants
- hotels and wellness facilities, spa centres
- hospitals and clinics, residences for senior citizens
- catering
- farming, nurseries, tree nurseries
- winegrowing
- swimming pools
- car-wash plants
- industrial establishments (bakeries, butcher's shops, hair styling and cosmetic salons, etc.)
- tourism, boating, cruises
- irrigation plants
- district heating plants
- public facilities

Type B biobird® Water Vitaliser *

for ponds

for use in:

- garden ponds, ponds for swimming, whirlpools
- fish ponds, koi carp ponds
- golf ponds
- natural bathing ponds, swimming pools
- fountains, trick fountains
- large-capacity aquariums

Dimensions available:
3/4" to 1 1/2".

Type A installation instructions:

Installation is possible in all positions, should, however, be carried out upstream from all filters and any existing chemical systems.

A minimum distance of 60 cm should be observed between the **biobird® Water Vitaliser** and electric water treatment equipment or iron exchangers.
